

TO MY DEAR SPONSORS

Hi! My name is Ali SHOKOR and I am a student at Idad Center for Children with Special Needs. I go to the Early Intervention Section because I am still small and there's so much for me to learn before I join the Special education Classes...I love my teachers, and all the therapists who take great care of me: they teach me how to walk without falling, how to climb stairs, how to throw the ball, they also teach me how to hold the spoon and eat without spilling my food, and they teach me how to speak well so everyone can understand what I am trying to tell them!

I have many friends at school and I like each and every one, and I think they like me too.

I still cannot draw well, that is why I am not sending to you any picture now...But I promise that as soon as I can draw, I will send you some drawings.

Thank you for being my sponsors!

Ali
