

Skola International Trust for
Special Education

University Internship Programme

Who?

SITSE offers internship opportunities for students who have completed or have nearly completed their university studies in the areas of special education such as educational psychology, speech and language therapy, occupational therapy, and general education.

What?

Our internships are under the direction of relevant special education professionals. Students gain practical knowledge while working with students at international schools. Generally, interns work as learning support assistants or with relevant therapists in order to make connections between theory and practice. SITSE provides interns with accommodation and a stipend throughout their internship in London.

Where?

Currently all internships will take place at the International Community School in central London. Please visit the ICS website at www.ics.uk.net

When?

Internships can be organized from three months to one year. Internships are generally based around the school's academic calendar.

For more information:

Please contact our programme director, Alan Andrew for details.
